| <b>Strategy:</b>                          | <p>The Fund seeks to achieve its investment objectives by investing, directly or indirectly, in income-generating, credit-related investments. The Fund will invest primarily in domestic and foreign privately-held investment vehicles managed by private fund managers that pursue various credit-related strategies. The Fund's investments will be made either directly into these privately-held investment vehicles or through co-investment opportunities offered by such managers alongside these privately-held investment vehicles (collectively, "Private Funds"). The Private Funds typically deploy capital outside of traditional stock and bond markets. These investments aim to pay current distributions or accrue income over time. Investments will typically be focused in the private lending space with a particular emphasis on asset-based lending (loans that rely on the values of the assets that a company owns for repayment of the loan in the event that the company cannot repay the loan from cash flow) and lending to necessity-based industries (loans within certain industries that are necessity-based and less sensitive to economic turbulence or recessions like food or healthcare).</p> |
