| <b>Objective:</b>                        | The Fund's investment objective is to seek attractive long-term capital appreciation.<br><br>The Fund will seek to achieve its investment objective by investing in a broad portfolio of investments in private companies in their early (i.e., venture capital) and growth stages of development. The Fund intends to provide shareholders with access to venture capital and growth investments that typically are available only to larger institutional investors. The Fund may gain access to venture capital and growth investments through a number of different approaches, including: (i) secondary investments in (a) the equity and/or debt of private companies and (b) private funds, holding vehicles or other investment vehicles ("Portfolio Funds") managed by unaffiliated third-party managers ("Portfolio Fund Managers"); (ii) primary direct investments in the equity and/or debt of private companies, including co-investments; and (iii) primary investments in Portfolio Funds. The Fund will seek to provide investors with exposure to a broad spectrum of types of venture capital and growth opportunities across industry sector, investment stage and size, geography and sub-asset classes in an evergreen investment structure. The Fund will concentrate in the information technology group of industries while maintaining exposure across a number of industry sectors. These industry sectors include artificial intelligence, enterprise software, technology-enabled products and services, consumer, healthcare and other industries the Adviser believes are positioned to benefit from favorable long-term secular trends. These trends encompass the broad digital transformation and technological adoption across multiple sectors, the migration to cloud-based and hybrid infrastructure models and the growing imperative for enhanced cybersecurity and quantum technologies. |
